SPECIFICATIONS

Change is good... the groundbreaking benefits

The PANELLIFT® Model 439 will outperform all manual drywall lifts in the industry. Expect low maintenance and long life since there are no cables or sheaves to replace. The patented **heavy duty chain** drive system delivers safe, long-term use, sheet after sheet and it's backed by a **three year drive train limited warranty**. The unique **torque limiter** ensures that only safe load weights are going up and damage to the machine from overloading is prevented. Low loading height (35") makes it easy to load and the high 14'5" reach means you can reach 95% of all ceilings without extra extensions. The patented, overload protected, heavy-duty chain drive lift mechanism of the PANELLIFT® Model 439 makes it the safest, longest lasting, lowest maintenance, easiest to operate, most versatile drywall lift available. Another of the **World's Best Drywall Lifts™** from Telpro Inc.

Accessories available:

- 18" Extension - extends reach to 15'11"
- Loader Attachment - reduces loading height to 4"
- Storage & Transport Stand - secures your investment
- Look for more accessories coming soon!

Product support is readily
available 5 days a week.

Telpro Inc. introduces the new patent pending Model 1065 Drill Drive™ Adapter to convert manual cranking PANELLIFT® brand drywall lifts into dual powered lifts.

Couple the Drill Drive™ with the new revolutionary Chain Drive PANELLIFT® Model 439 and you can have a lift that can do it all!

No extensions to add, no cables or sheaves to replace, and with the Drill Drive™ adapter - it becomes faster and more effortless to install drywall.

Use a corded or cordless drill to power lift your drywall into place. The dual action (manual or powered) provides ultimate versatility. Use a drill when you want the power to quickly raise sheets or manually crank it when you want pinpoint precision or when you don't have a drill on hand. The Drill Drive™ is a great addition to your PANELLIFT®.
